Note from Nurse Ashley

It is more common to see nits than adult lice in a child's hair.

Head lice are a nuisance, but they don't cause disease and are nothing to be ashamed of! Lice move by crawling—they cannot jump or fly. Head lice is almost always hair to hair contact. **Tip: do NOT share combs, brushes, or hats.** Eliminating lice is pretty easy with a little time and patience. OTC (over the counter) treatment applications are available. If you have any questions, concerns, or need help with treatment, please call or e-mail me. Thanks!
